

of its internal data structures for cases where the target supports atomics or doesn't.

## 0.3.2 - 2023-11-06

- Use `atomic-polyfill` for `riscv32`
- Removed unused dependencies (`static_cell`, `futures-util`)

## 0.3.1 - 2023-11-01

- Fix spurious "Found waker not created by the Embassy executor" error in recent nightlies.

## 0.3.0 - 2023-08-25

- Replaced `Pender`. Implementations now must define an extern function called `__pender`.
- Made `raw::AvailableTask` public
